GUARDRAIL REPLACEMENT ON NH 101 IN KEENE-MILFORD
33 MILES FROM OPTICAL AVENUE IN KEENE TO NH 101A IN MILFORD

The New Hampshire Department of Transportation announces work is expected to begin the week of May 22, 2006 on guardrail replacement and other safety improvements on NH Route 101 in Keene and Milford.

This project begins on NH 101 at the intersection with Optical Avenue in Keene and proceeds approximately 33 miles to the intersection with NH Route 101A in Milford.

Two-way traffic will be maintained whenever possible. Lane closures and alternating one-way traffic will only be allowed during daytime hours if needed, with two-way traffic restored prior to non-working hours. Electronic message signs will alert motorists, and flaggers will be used to guide motorists through the work zone.

Delucca Fence Company, Inc. of Methuen, Massachusetts is the contractor for the \$1.8 million project, which has a completion date of June 2007.
